DETAILED ACTION

This action is in response to applicant's amendment/arguments filed on 6/21/2007. Claims 1 - 9 and 15 are pending and claims 10 - 14 and 16 are cancelled.

Allowable Subject Matter

Claims 1- 9 and 15 are allowed.

The following is an examiner's statement of reasons for allowance: Consider independent claim 1, the best prior art of record found during the examination of the present application is: **Rees et al. (UK Patent Application # GB 2,272,604)**.

In view of the present application, Rees et al. discloses a receive sensitivity measuring device coupled to the transmit-and-receive path and receive-only path of the base station in order to measure the receive sensitivity. In addition, Rees discloses a signal selector and a terminal that transmits a test signal and measures the receive sensitivity generated using said test signal.

However, compared to the present application and invention, Rees et al. fail to disclose a receive sensitivity measuring device comprising: a first and second transmitter, a first and second receiver, and a combiner that combines first and second signals into a single signal and transmit the single signal to the terminal.

In light of the above cited and other cited references found during examination, the present invention is novel and non-obvious since the cited prior arts of record do not contain either explicitly or implicitly the limitations as a whole as disclosed in claim 1. In

Art Unit: 2618

addition, any reasonable combination of the cited references cannot be used to reconstruct the claimed invention. Therefore, the present application as claimed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
